-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for clip to prevent the elastomeric ligature material from slipping through (described in paragraph [0022] on lines 9-13), does not reasonably provide enablement for the clip to be slidably attached to the ligation loop (described in line 5 of claim 1). The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The examiner is unclear as to how the aluminum clips are slidably attached, when their intended use is to prevent movement of the loop. The applicant needs to decide whether the clips are slidably attached or fixed, because if it is slidable then the loop could possibly move causing the invention to fail.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 5,681,329 Callicrate

In reference to claim 1, Callicrate discloses the same invention being a castration loop comprising: an endless ligation loop (108), a first deformable extruded aluminum clip (32), and a second deformable extruded aluminum clip (shown at the distal end below element 110 in figure 14 of Callicrate and described in column 7 on lines 30-34) slidably attached to the endless ligation loop.

In reference to claim 2, Callicrate discloses the same invention wherein deformation of said second deformable extruded aluminum clip forms a forward loop and a rearward loop in said endless ligation loop without significantly damaging said elastomeric ligature material shown in figure 14 of Callicrate.

In reference to claims 3 and 4, Callicrate discloses the same invention meeting all the structural requirements claimed. The device of Callicrate comprises an aluminum clip capable of being characterized as having a top and a bottom being oriented in the ligation tool with the top facing upwardly away from the ligation tool or the top facing downward toward the ligation tool shown in figures 1-15 of Callicrate.
